ABOUT ME

Frontend Developer with 2+ years of experience in dynamic eCommerce web applications. Proficient in React, Node.js, and Express.js, specializing in user-friendly designs and responsive UI components. Passionate about delivering innovative solutions to enhance user experience

EXPERIENCE

White Horse Technologies Private Limited, Bangalore

Frontend Developer

Aug 2022 – Present

- Developed and optimized responsive UI components for eCommerce applications using React.js and Bootstrap, achieving a 20% reduction in load times.
- Enhanced user engagement by seamlessly integrating API flows between front-end and back-end systems, improving overall application functionality.
- Designed and implemented interactive features that enhanced the user interface, driving conversion rates for eCommerce platforms.

PROJECTS

DREAM PAIRS

Dream Pairs is a dynamic eCommerce platform specifically designed for footwear. The project focuses on providing users with an engaging and seamless shopping experience through modern technologies and user-centric design.

Technology used : React.js, Redux, TypeScript, Git, HTML5 & CSS3, Bootstrap & Tailwind CSS

- Developed a dynamic eCommerce platform for footwear, enhancing user experience with responsive design and intuitive navigation.
- Implemented product categorization and a streamlined shopping cart, incorporating promotional discounts and customer rewards.
- Collaborated on product pages featuring detailed descriptions and customer reviews, optimizing for mobile responsiveness and cross-browser compatibility.
- Analyzed user feedback and site analytics to continuously improve functionality and aesthetics, leading to increased customer engagement and sales.
